

PLANT SCIENCE SEMINAR SERIES WINTER 2012

**MONDAYS AT 4:00 PM IN
AG LIFE SCIENCES 4000**

CO-SPONSORED BY THE DEPARTMENTS OF: BOTANY & PLANT PATHOLOGY,
CROP AND SOIL SCIENCE, HORTICULTURE AND FOREST ECOSYSTEMS AND SOCIETY

January 9	<i>“Climate Change: Recent and Predicted Effects on Forest Composition in the Pacific Northwest”</i>	Richard Waring, N. Coops & S.W. Running Forest Ecosystems and Society, Univ. of British Columbia, & Univ. of Montana
January 16	<i>No Seminar</i>	Martin Luther King Jr. Holiday
January 23	<i>“Environmentally Regulated Unproductive Alternative Splicing: A Widespread Phenomenon Among Plant Circadian Clock Genes”</i>	Sergi A. Filichkin Botany and Plant Pathology
January 30	<i>“A New Digital Soil Map of the World”</i>	Alfred Hartemink University of Wisconsin
February 6	<i>“Collaborating for Healthy Forests and Communities: Building Partnerships Among Diverse Interests”</i>	Ryan Gordon & Bruce Schindler Forest Ecosystems and Society
February 13	<i>“Distribution and Productivity Patterns of Desert Plant Species of Economic Importance in Mexico”</i>	Ricardo Mata-Gonzalez Rangeland Ecology and Management
February 20	<i>“A Taste of Tasmania: Applied Research in Wine Grape and Walnut Pathology”</i>	Kathy Evans Tasmanian Institute of Agriculture
February 27	<i>“Exotic Insects and Exotic Travels: Pest Threats and Threatened Species”</i>	Jeff Miller Horticulture
March 5	<i>“Riparian Revegetation in the Willamette Valley: A Practitioner's Guide”</i>	Kendra Smith Willamette Model Watershed Program Dir., Bonneville Environmental Foundation
March 12	<i>“Trees, Truffles and Beasts: How Forests Function”</i>	Jim Trappe Forest Ecosystems and Society
