

**ALL SEMINARS IN CORDLEY 2087**  
**12:00-1:00pm**

DEPARTMENT

OF

BOTANY

AND

PLANT

PATHOLOGY

OREGON

STATE

UNIVERSITY

SPRING TERM

2018

**May 8th, Tuesday**

**Shankar Shakya** (Nik Grunwald) "Population Dynamics and Effector Diversity in *Phytophthora* Species"

**Melinda Guzman** (Bob Martin) "Identifying and characterizing the viruses associated with Raspberry leaf curl disease"

**May 15th, Tuesday**

**Catherine Wram** (Inga Zasada) "How do Post-Plant Nematicides Kill Plant-Parasitic Nematodes?: Nematicide Effects on Physiology and Gene Expression"

**Evan Perkins** (Chris Mundt) "Differential Effects of First Year Wheat on the Establishment of Take-all Decline"

**May 22, Tuesday**

**Max Combest** (Aymeric Goyer) "Investigating the Roles of Genes Involved in the HR Response of Potato to Potato Virus Y"

**Matthew Martin** (Pankaj Jaiswal) "Understanding Abiotic Stress Responses in Poplar and Sorghum: A Networks Based Approach"

**May 29, Tuesday**

**Ed Barge** (Posy Busby) "Community and Population Ecology of the *Populus trichocarpa* Leaf Mycobiome"

**Carolina Pina Paez** (Joey Spatafora) "Systematics and Population Biology/Ecology of *Rhizopogon* in the Sky Islands of the Madrean Archipelago, Southwestern United States and Northwestern Mexico"

**\* June 6, Wednesday\***

**Noor Al-Bader** (Pankaj Jaiswal) "Genotype-Dependent Abiotic Stress Response in Rice"

**Elisa Di Meglio** (Bruce McCune) "Impacts of Heavy Metal Dust on Arctic Tundra Vegetation and Lichen Community Over Time"

**Everyone is Welcome!**
